T V A N T E N N A S

THE ELEMENTS OF GOOD RECEPTION

Over the years, TV has evolved into an integral part of our lives. News, sports and entertainment programming shape our day and give us hours of enjoyment. Now, with the emergence of new technologies such as HDTV, viewing possibilities are endless. TERK helps you capture this potential with superior indoor and outdoor antennas that enable you to maximize your TV experience. TERK's family of TV antennas combine cutting edge technology, installation simplicity and unique design to enhance the reception of any TV, no matter how basic or advanced.

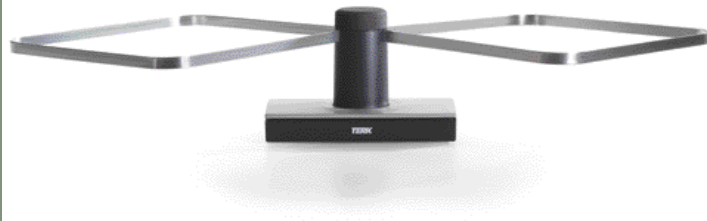

INDOOR ANTENNAS

TERK has always been known for its unique design. All of TERK's indoor antennas are designed to be cutting edge, to blend in with the design of today's TVs, but to also be easy to install and use.

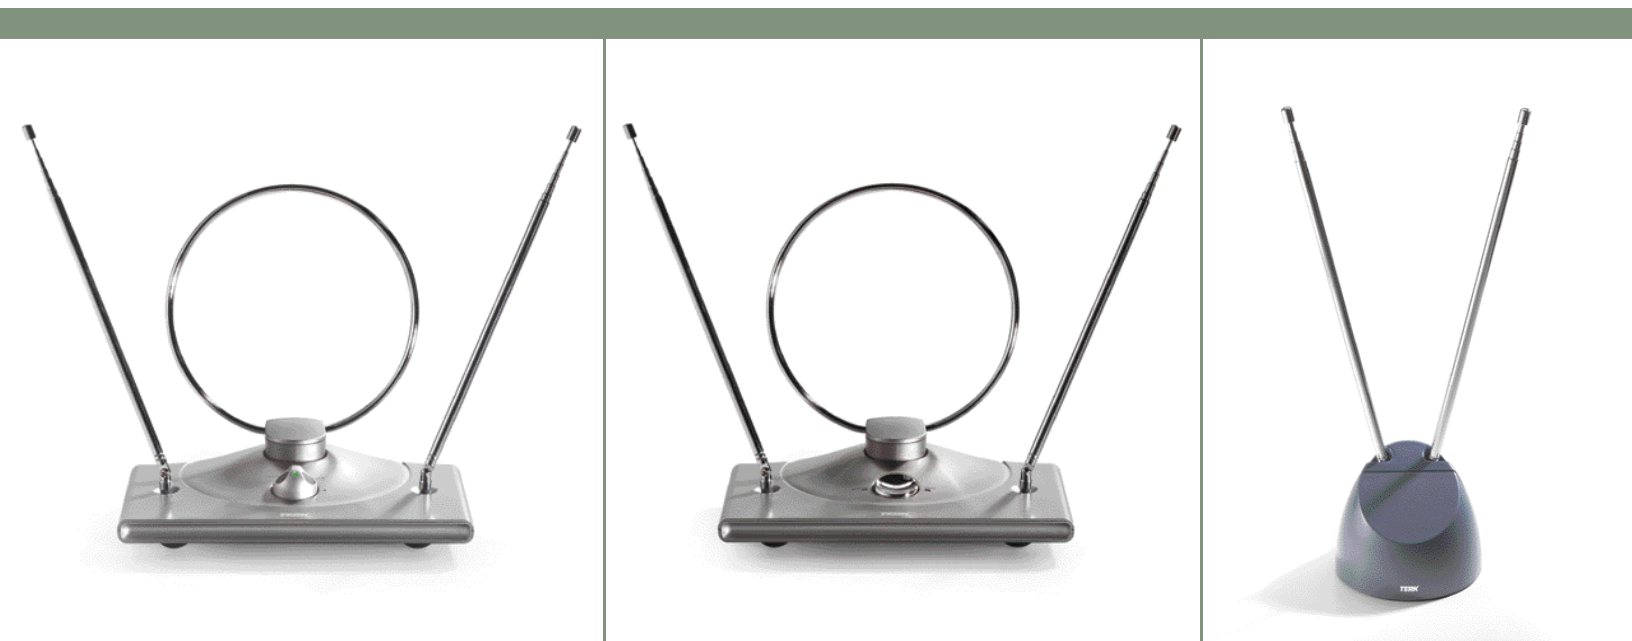

TV5 :: Low-profile, Amplified Indoor Antenna

- Built-in video selector switch to switch between broadcast TV and a video source
- Low-profile design; fits inside most television cabinets
- Includes both VHF and UHF capability for reception of channels 2 through 69
- Low-noise broadband amplifier features one-touch adjust and selectable bypass
- Easy to install and adjust

TV4 :: Low-profile Indoor Antenna

- Low-profile design; fits inside most television cabinets
- Includes both VHF and UHF capability for reception of channels 2 through 69
- Easy to install and adjust

TV3 :: Amplified, Indoor Antenna with Video Switch

- Built-in video selector to switch between broadcast TV and a video source
- High-quality 44" chrome elements
- Includes both VHF and UHF capability for reception of channels 2 through 69
- Low-noise broadband amplifier

TV2 :: Indoor Antenna with Video Switch

- Built-in video selector to switch between broadcast TV and a video source
- High-quality 44" chrome elements
- Includes both VHF and UHF capability for reception of channels 2 through 69

TV1 :: Indoor Replacement Antenna

- High-quality 40" chrome elements for improved reception
- Includes both VHF and UHF capability for reception of channels 2 through 69
- Easy to install

OUTDOOR ANTENNAS

From our patented satellite dish clip-on antennas, to our versatile TV55, the TERK line of outdoor antennas supply solution for great TV reception. All are designed to be easy-to-install and weather resistant.

TV55 :: Amplified Indoor/Outdoor Antenna

- Compact design with the performance of a larger antenna
- Dual-mode amplifier allows a choice of best gain setting for optimum reception
- Amplifier is impedance matched for best HDTV performance
- Ultra-durable, weatherproof housing

TV44 :: Amplified Clip-on Outdoor Antenna

- Picks up VHF, UHF and HD signals so consumers can enjoy local programming along with satellite programming
- Features an internal amplifier that minimizes signal loss
- Clips on to existing satellite dish
- Installs easily on 18" x 20-24" multi-satellite dishes with no tools
- Built-in diplexer allows both satellite and local signals to enter the house through one cable

TV42 :: Amplified Clip-on Outdoor Antenna

- Mounts onto any 18-inch satellite
- Picks up VHF, UHF and HD signals so consumers can enjoy local programming along with satellite programming
- Built-in amplifier improves picture quality
- No additional power supply required
- Ultra-durable weather-resistant construction
- Built-in diplexer allows both satellite and local signals to enter the house through one cable

TV35 :: Outdoor UHF/VHF Antenna

- Constructed of heavy gauge aluminum and galvanized steel
- Seamless welded, sealed elements that withstand all types of weather conditions
- Optimal VHF/UHF and HDTV reception
- High-performance design and engineering
- Easy, quick installation
